# About this Resource

Have your student read the text three times. Each time they read it have them color in one of the smiley faces. Have students then read through the questions to see if they can comprehend what they read. I will sometimes read the questions to them since I am assessing their comprehension of the text and not necessarily their ability to read the questions. I still let them *try* to read the questions though! I always let them go back and check the text if they need to! Finding evidence in the text is a great skill to practice!

Please let me know if you have ANY questions! Check out my other reading comprehension files at my TPT store: Ms. Stephanie Grace!

Thanks and Happy Teaching! 😊
